IFA-Test Systems - Interlaboratory Comparisons 2017

Dear Mr Obernauer,

Please find attached a folder with our programme of interlaboratory comparisons in 2017.

The IFA-Tulln is a department of the University of Natural Resources and Life Sciences, Vienna. We provide a proficiency testing scheme for external quality assurance in water analysis in co-operation with the Austrian Federal Ministry of Agriculture, Forestry, Environment and Water Management and the Environment Agency Austria (Umweltbundesamt GmbH).

We organise about 20 interlaboratory comparison rounds per year, covering major ions, metals and trace elements, volatile halogenated hydrocarbons (VOC) and BTEX & MTBE in synthetic and natural (surface or ground) water. Furthermore, we organise PT rounds on pesticides, the 16 EPA polycyclic aromatic hydrocarbons (PAH), hydrocarbon oil index and phenol index, pharmaceuticals, industrial chemicals and artificial sweeteners in natural water.

A price list is attached to this letter. If you have any further questions, please do not hesitate to contact me.

Best regards

Dr. Wolfgang Kandler
